

NEB's pick
of curious,
interesting
and useful
products.

Bent Trims

Makes quick work of curved and radius applications. The flexible molding is offered as a solution for trimming round and arched windows and doors, curved stairwells, round rooms, and other tricky shapes. Billed to be lightweight and durable, the polyester product installs "like wood," and can be cut with conventional power tools. For information, contact Lajon's Molding Madness, 7820 Boulder Avenue, Highland, CA 92346; 714/864-4942.

Distinctive Planks

Aged, rare, and sometimes even extinct wood is used to make Aged Floors. Most of the wood used to make the flooring is taken from structures 100 to over 200 years old, making it of special interest to those working in restoration. The manufacturer often goes to unusual depths to get their product. For example, the latest addition to their product line is "River Wood," which had been—since the 1840's—submerged in the cold running water of the Susquehanna River. For more information, contact First Capital Wood Product, Inc., 147 West Philadelphia St., York, PA 17403; 717/843-8104.

Curvaceous Walls

Can fulfill a builder's dreams and avoid nightmares. The lightweight Curvall flexible wall panels can

conform to most curves, according to the manufacturer, creating arched windows and walls, curved stairwells, rounded comers, "S" walls, columns or pillars. No, you don't have to soak it, wet it, or score it. For more information, contact Domtar Industries Inc., P.O. Box 508, Lockport, NY 14094; 716/434-8881.

Peelable Floors

Not a very permanent floor, but we thought you'd like to know. PMP is the water-based, non-flammable, non-toxic coating being peeled in the photo above. Mostly used by television and photography studios, the coating acts as a "canvas" that can be painted and repainted with emulsion paint. The manufacturer can supply a pattern-painting machine for the application of effects such as tiles and parquet-floor finishes. For more information contact British Information Services, 845 Third Avenue, New York, NY 10022; 212/752-8400 for forwarding to the manufacturer, Protector Clean Ltd. of Birmingham, England.

Jamb Without the Mess

Cuts down installation time and cost. Jamb Plates for wood frame doors and windows promises to eliminate the need for shimming or nailing through the frame, keeping damage to the frame to a minimum, while making the anchor more secure. For more information, contact Grajam Products, 823-810 W. Broadway, Vancouver, B.C. Canada V5Z 4C9. ■
