PVC Post Wraps

Can be painted to match the house

KleerWrap Post Wraps carry a lifetime guarantee against splintering, rotting, delamination, and swelling due to moisture, and they're also impervious to insects, according to Kleer Lumber. Designed to encase structural posts, the cellular PVC wraps are not load-bearing.

Wraps are shipped assembled. The installer cuts the wrap to length, removes one side to slip it over the post, and glues the missing piece back in place. Molding to trim the top and bottom is included, and additional bed, crown, and base moldings are available.

Post wraps are white and can be left as is or painted to match existing trim or house colors. They come in lengths of 8 feet and 10 feet in three widths: 4 inches, 6 inches, and 8 inches. An 8-foot-long wrap 4 inches square is \$80; the 6-inch size is \$120. The largest version—10 feet long and 8 inches square—costs \$160.
